Subject : BSR system certificate

Dear sirs,

with reference to the development activity carried out on your equipment, we hereby certify that the **HPA/Faip M624** tyre-changer, properly updated and equipped with the "**Ally 80**" tower and the "**KASRA**" BSR tooling kit, properly provided with **paper** and **video instruction**, is capable and therefore approved for mounting and dismounting the **Bridgestone Support Ring (BSR)\*** system.

We besides declare that this certification is valid **only** under the condition that the above mentioned equipment keeps the same configuration as Bridgestone Co. tested. Furthermore, this document doesn't apply to the dealer, whose skill will be judged after a specific training by Bridgestone Co. In reason of this, eventual dealer certification will follow.

It is implicit that the approval is valid also for the complete M624 series, including models:

- **M 724**
- **M 724 Rally**

Bridgestone Co. kindly thanks for your cooperation.
